1 Research questions:

- Visual summary of corona virus contagion and dead rates in the following countries
 1. Italia
 2. Germany
 3. Greece
 4. Switzerland
 5. Sweden
 6. France
- Visual summary of corona virus cases and deaths rates in the following countries
 1. Italia
 2. Germany

2 Data set introduction

"The dataset contains the latest available public data on COVID-19 including a daily situation update, the epidemiological curve and the global geographical distribution (EU/EEA and the UK, worldwide).

On 12 February 2020, the novel coronavirus was named severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) while the disease associated with it is now referred to as COVID-19. Since the beginning of the coronavirus pandemic, ECDC's Epidemic Intelligence team has been collecting on daily basis the number of COVID-19 cases and deaths, based on reports from health authorities worldwide. To insure the accuracy and reliability of the data, this process is being constantly refined. This helps to monitor and interpret the dynamics of the COVID-19 pandemic not only in the European Union (EU), the European Economic Area (EEA), but also worldwide. Every day between 6.00 and 10.00 CET, a team of epidemiologists screens up to 500 relevant sources to collect the latest figures. The data screening is followed by ECDC's standard epidemic intelligence process for which every single data entry is validated and documented in an ECDC database. An extract of this database, complete with up-to-date figures and data visualisations, is then shared on the ECDC website, ensuring a maximum level of transparency." 3 Exploratory data analysis

3.1 Overall

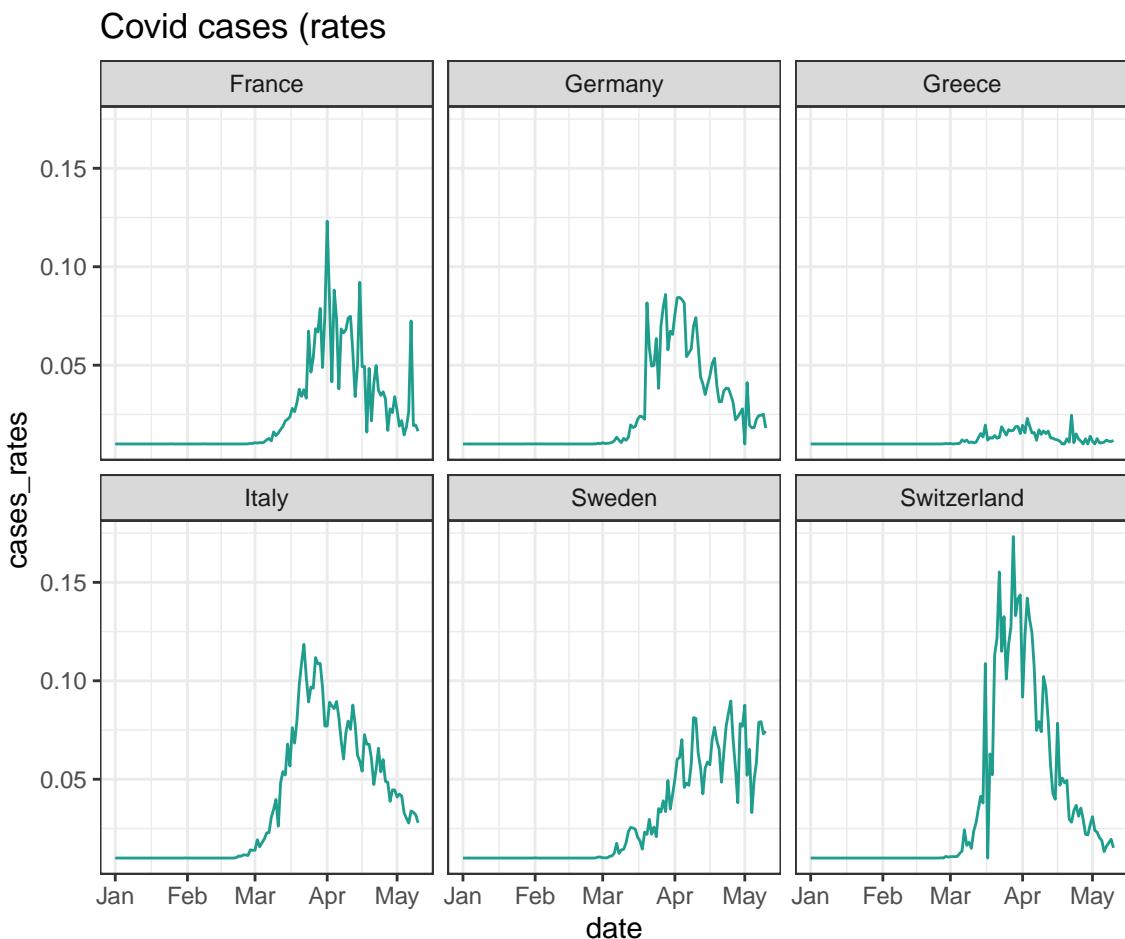

Figure 1: Rates of covid cases

In figure 1 we observe the corona virus rates of a number of european countries ...

Figure 2 wdisplay the death reates of corona virus rates in Italy, Germany ...

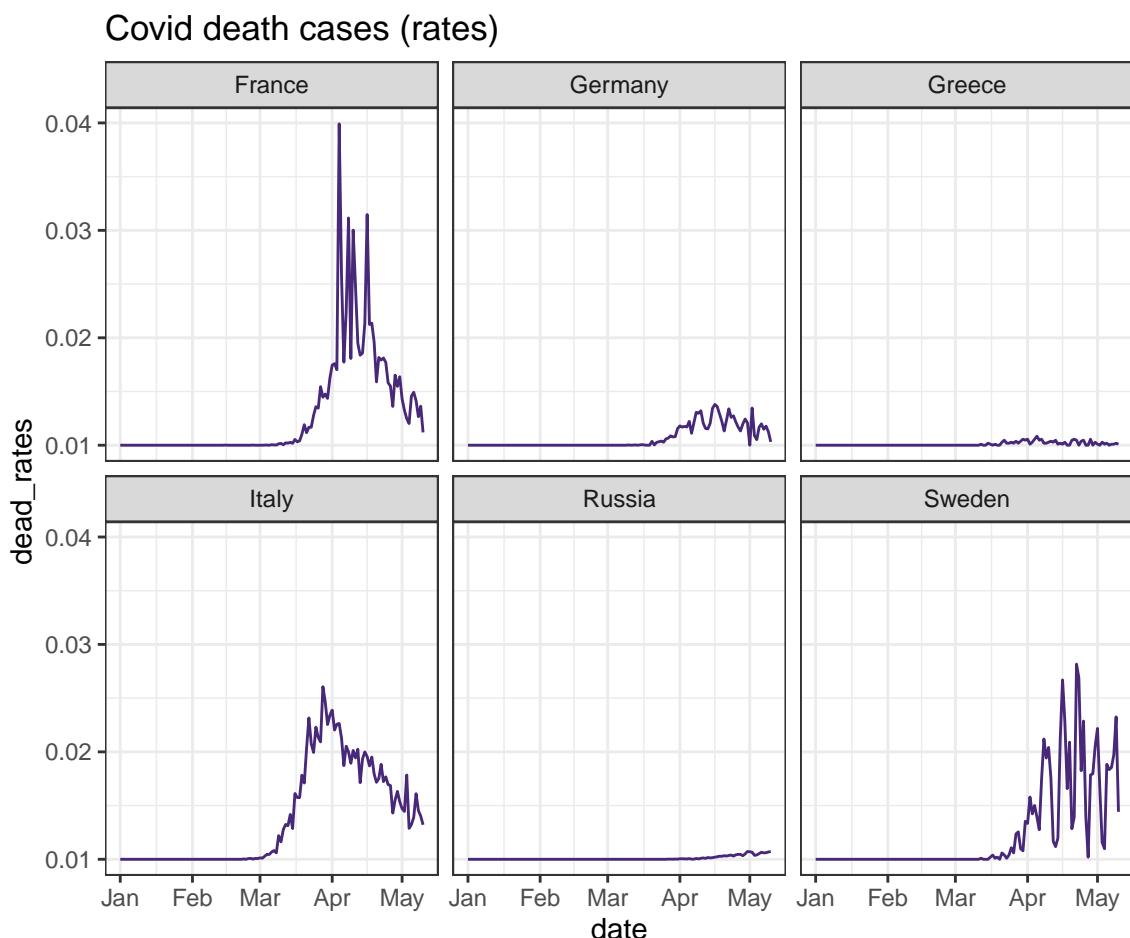

Figure 2: Death reates for COVID19

3.2 Oceania

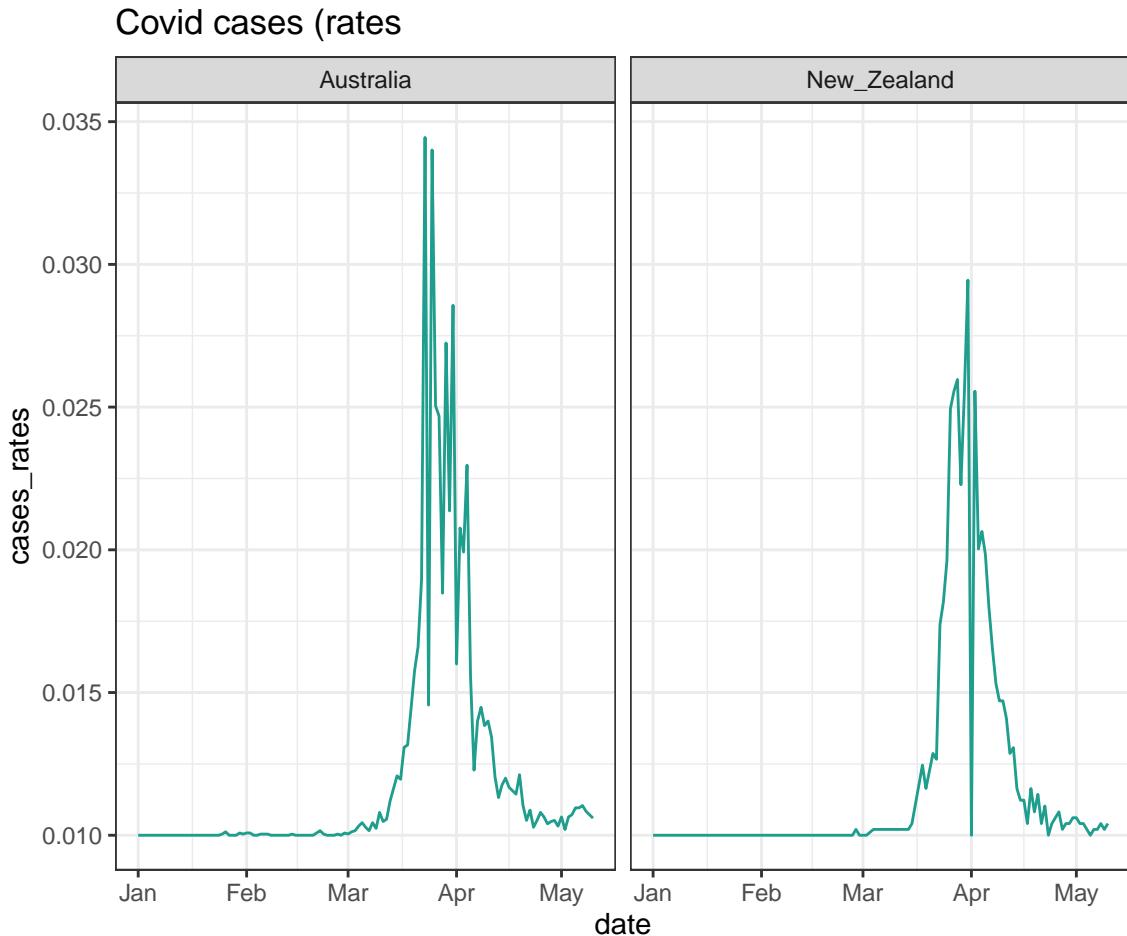

Figure 3: COVID cases in Australia and New Zealand

The rates of corona virus in Australia and New Zealand over time are displayed in [3](#)

The death rates of corona virus in Australia and New Zealand over time are displayed in [4](#)

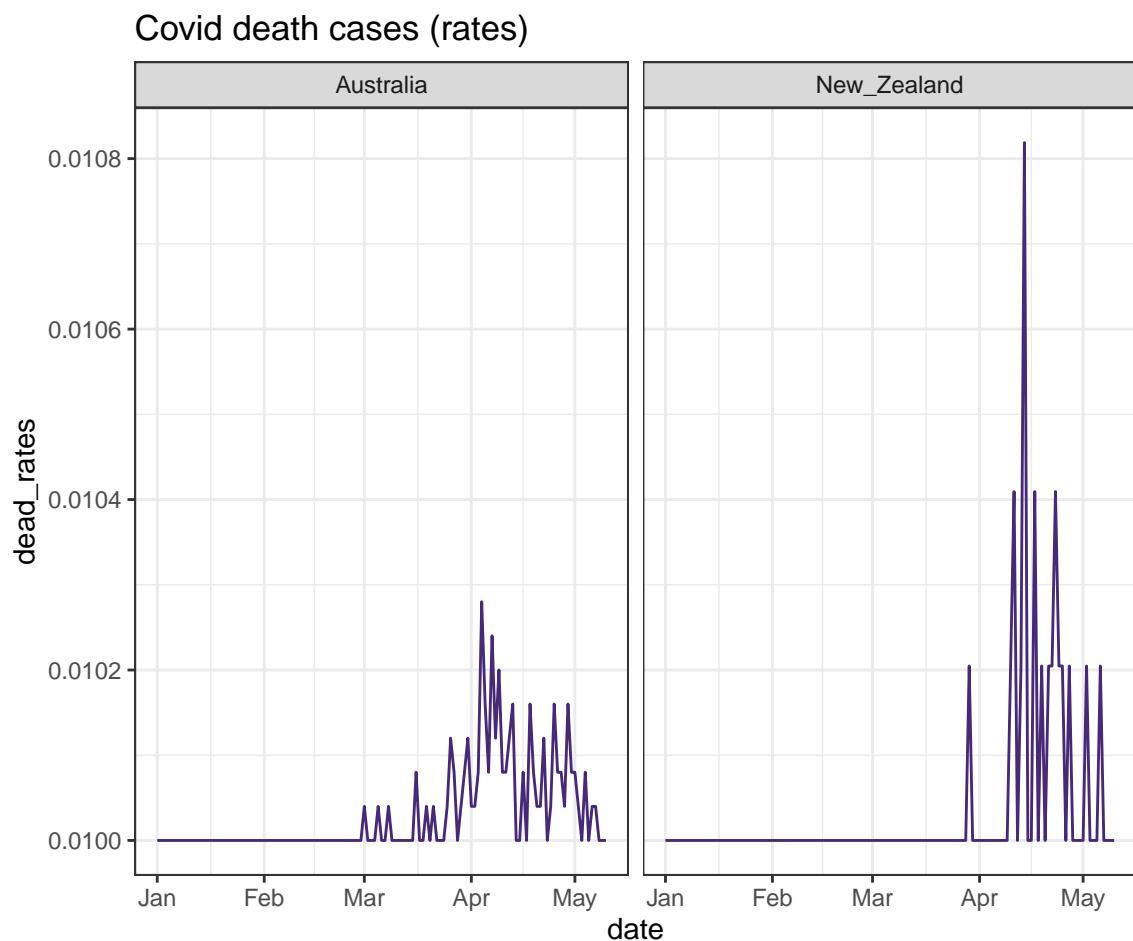

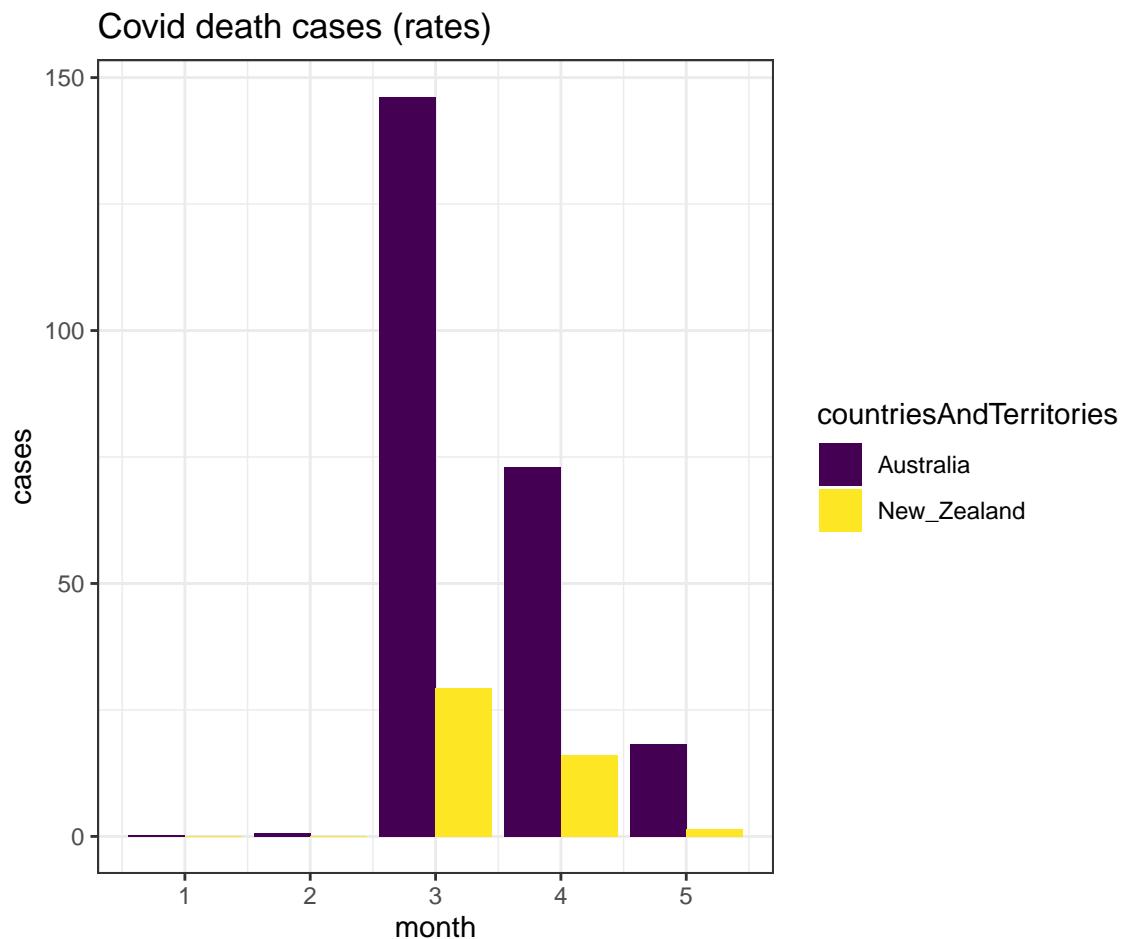

Figure 4: Death rates of COVID in Oceania

4 Comparisons

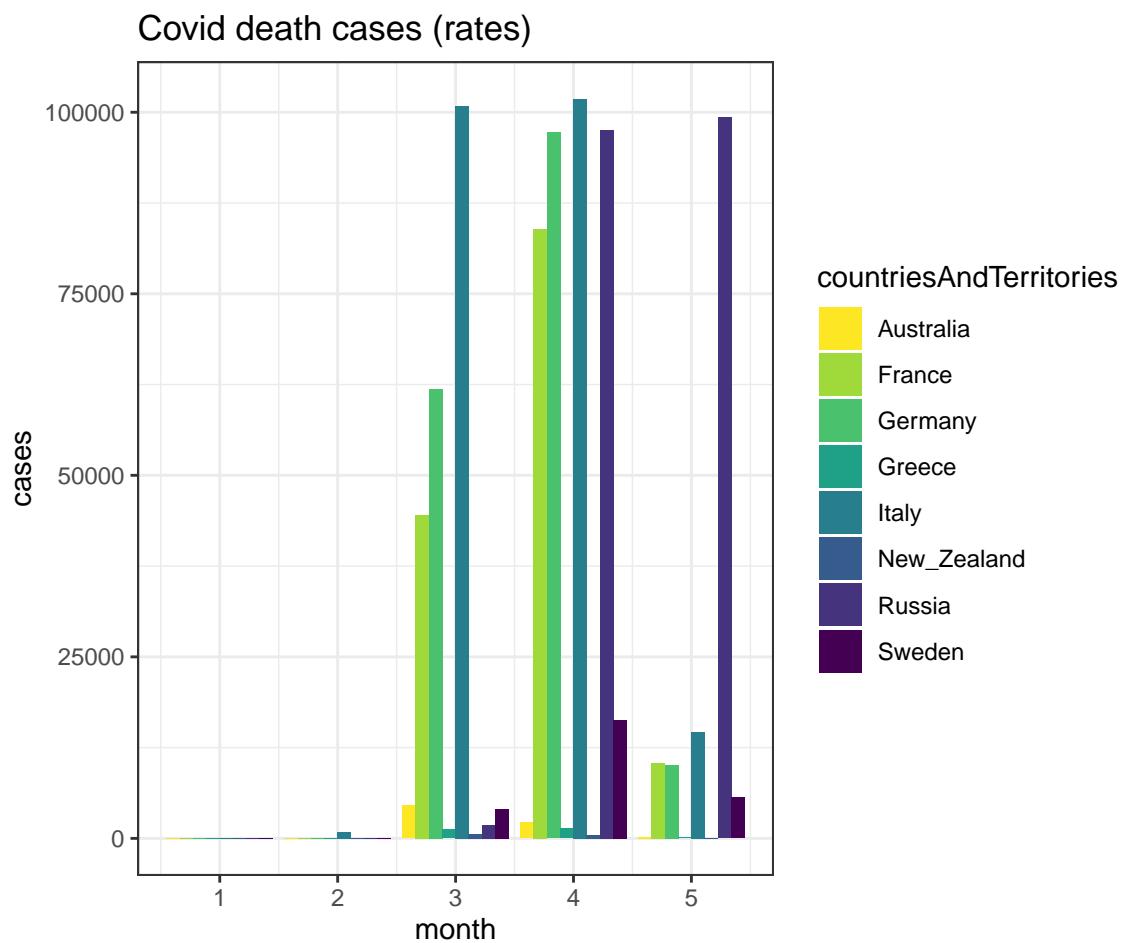

Figure 5: Covid cases

Table 1: Covid cases and deaths per month

countriesAndTerritories	month	year	cases	deaths
